## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 20-26 and 28-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over GB 2,297,977 A. The reference discloses detergent compositions containing surfactant, a detergency builder comprising zeolite P, clay, and an optional clay flocculant (abstract). Suitable surfactants include anionic, nonionic, cationic amphoteric and zwitterionic materials, as well as mixtures of same (p. 3, 3<sup>rd</sup> para.) Alkyl sulfates and their ethoxylated analogues are disclosed as suitable, as are alkoxylated fatty alcohols (p. 3, bottom). Total surfactant concentration is 1-60% (p. 5, 4<sup>th</sup> para.) The clay is preferably a smectite, and is present at 0.05%- to 40% (p. 8, 3<sup>rd</sup> para.) A number of smectites are disclosed as suitable, and use of a combination of clays would be obvious in the absence of unexpected results. Suitable flocculating agents include lime and alum (p. 11, 4<sup>th</sup> para). The floc is present at 0.005% to 10% (p. 10, 3<sup>rd</sup> para.) Carbonate salts and polycarboxylates may be added (examples). Use of phosphates as builders is disclosed as conventional on p. 1. Addition of fluorescers (brighteners) is disclosed at the bottom of p. 12. Preferred forms of the compositions are as granules, powders and tablets (p. 13, 2<sup>nd</sup> para.) Addition of cationic softeners is disclosed at the top of p. 10. This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

Art Unit: 1751

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
